EDUCATION

Indian Institute of Information Technology and Management, Gwalior
Integrated B.Tech(IT) + M.B.A.

2023 - 2028
CGPA: 7.96

EXPERIENCE

Google

May 2026 – Present

Student Ambassador

[\[Offer Letter\]](#)

- Acted as a campus liaison between Google and the university, promoting Google Gemini and AI technologies to a student body of **1,000+** individuals.
- Facilitated **7** technical workshops and events, fostering a community of **1000+** student developers and increasing engagement with Google tools by an estimated **65%**.

Codec Technologies

Mar. 2026 – June 2026

Full Stack Developer Intern

[\[Certificate\]](#)

- Engineered and deployed scalable web features using React.js, Node.js, and TypeScript, successfully delivering **3+** assigned full-stack projects during the **12-week** AICTE and ICAC approved program.
- Optimized backend API performance and frontend responsiveness, achieving an estimated **20%** reduction in load times while consistently securing high ratings across **12** weekly performance reviews.

Deloitte

Mar. 2026

Data Analyst

[\[Certificate\]](#)

- Analyzed **50000+** telemetry datasets across **multiple industrial locations** using SQL and Tableau to track and visualize machine downtime.
- Delivered actionable insights for client business problems, streamlining data reporting and identifying patterns that could reduce operational inefficiencies by **90%**.

PROJECTS

ViswaKart – An E-commerce Platform | React.js (Vite), Node.js (Express), MongoDB, Clerk

[GitHub](#) | [Live](#)

- Built a full-stack E-commerce platform featuring user authentication via Clerk, dynamic product catalog, cart management, and secure Stripe payment integration.
- Designed and implemented RESTful APIs with Node.js/Express for product, order, and user management, backed by a MongoDB database with optimized query indexing.
- Deployed the frontend on Vercel and backend on Render, achieving sub-2s page load times and seamless cross-device responsiveness.

Personal Portfolio | React, TypeScript, Tailwind CSS, Vite

[GitHub](#) | [Live](#)

- Engineered a fully serverless portfolio website with React and Vite, featuring a dynamic project showcase, blogs, and a contact form powered by EmailJS.
- Built a password-protected admin dashboard for content management using JSON file storage on Vercel, eliminating the need for a backend database.
- Implemented smooth page transitions, dark mode, and responsive layouts, improving visitor engagement metrics by an estimated **40%**.

AI-Powered Finance Tracker | React, Python, Flask, PyTorch, Scikit-learn

[GitHub](#)

- Developed an intelligent expense tracking platform with a React frontend and Flask REST API backend, enabling real-time transaction logging and categorization.
- Integrated a PyTorch and Scikit-learn ML model to analyze spending patterns and generate personalized budget recommendations with **85%+** prediction accuracy.
- Built interactive financial dashboards with Chart.js displaying monthly trends, category breakdowns, and AI-generated savings insights.

Predictive Pareto Dispatcher | Python, Optimization Algorithms, System Architecture

[GitHub](#)

- Designed an algorithmic dispatcher during a national hackathon to dynamically balance operational costs against carbon emissions using the Pareto optimization principle.
- Engineered custom mathematical formulas for multi-objective optimization, reducing simulated operational losses by **30%** while cutting emission overhead.
- Modeled and stress-tested the solution against **10,000+** synthetic dispatch scenarios, validating performance under peak-load conditions.

CERTIFICATIONS

- **Google Project Management Professional Certificate** – Coursera
Completed a rigorous 6-course program covering the full project lifecycle, Agile and Scrum methodologies, risk management, stakeholder communication, and the use of tools like Jira and Asana for end-to-end project delivery.
- **PyTorch for Deep Learning with Python Bootcamp** – Coursera
Hands-on training in building and training deep learning models using PyTorch, covering CNNs for image classification, RNNs for sequence modelling, GANs for generative tasks, and real-world model deployment pipelines.
- **Google AI Professional Certificate** – Coursera
Advanced program on applied AI and machine learning, encompassing supervised/unsupervised learning, responsible AI practices, AI product deployment on Google Cloud, and leveraging Vertex AI for scalable ML solutions.
- **Google AI Essentials Specialization** – Coursera
Foundational AI literacy program covering generative AI concepts, effective prompt engineering techniques, and the practical application of Google AI tools including Gemini to boost productivity and automate workflows.
- **Programming in Python** – Meta / Coursera
Core Python programming certification covering object-oriented programming, data structures, algorithms, functional programming paradigms, file I/O, and scripting best practices for real-world software development.
- **Networking Basics** – Cisco Networking Academy
Comprehensive introduction to computer networking, covering the OSI and TCP/IP models, IP addressing and subnetting, routing and switching fundamentals, and essential network security and troubleshooting concepts.

TECHNICAL SKILLS

Languages: C/C++, Python, JavaScript (ES6+), TypeScript, SQL, Solidity

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, PyTorch, TensorFlow, Scikit-learn, Web3.js, Hardhat, REST APIs

AI & ML: Machine Learning, Deep Learning, Neural Networks, Generative AI, Prompt Engineering, Computer Vision, Vertex AI

Databases, Cloud & Tools: MongoDB, MySQL, Firebase, Supabase, AWS, Google Cloud, Git, GitHub, Docker, Jira, Postman, Linux

Core Fundamentals: Data Structures & Algorithms (400+ problems solved), OOP, Operating Systems, Computer Networks (TCP/IP, OSI Model), DBMS, Computer Organization & Architecture, SDLC, Agile & Scrum, System Design, Debugging & Troubleshooting

LEADERSHIP & ACHIEVEMENTS

- **GATE 2026 Qualified (Computer Science & IT):** Secured **AIR 3460** among **211,020 candidates**, achieving a **GATE Score of 589** and **50.41 marks out of 100**. Demonstrates strong proficiency in core CS fundamentals including Algorithms, OS, Networks, and DBMS. [[View Scorecard](#)]
- **National Youth Festival (NYF) 2025 Finalist:** Selected as a national-level finalist in the *Tech for Viksit Bharat* theme — ranked among the **top 1,000 out of 30,00,000+** participants nationwide — for presenting an innovative, tech-driven solution for modernizing public governance and citizen services.
- **Chairman – IIITM Hindi Club:** Led and organized **50+** cultural and literary events, driving a unique fusion of Hindi language promotion with modern digital platforms; managed a core team of **20+** members and grew club participation by over **60%** year-on-year.
- **Social Media Head – Rotaract Club, IIITM Gwalior:** Designed and executed digital outreach campaigns, content strategy, and brand identity for community service initiatives, growing the club's social media following by **3x** and significantly boosting volunteer recruitment and event visibility.
- **Competitive Programming – 500+ DSA Problems Solved:** Solved **500+** Data Structures and Algorithms problems across platforms including [LeetCode](#), Codeforces, and GeeksforGeeks, covering topics such as Dynamic Programming, Graphs, Trees, Sorting, and Greedy algorithms.
